General Information

This general plan of the Referral Hospital ERU is a general mapping of all the services of the hospital and the way the supplies are splitted into modules.

Each coloured bordered cell represents one module of the ERU.

Each of these modules can be splitted into smaller entities in the different versions of the ERU hospital, but module content cannot be mixed one with another.

The different existing ERU Hospital in the Movement all fit into this general plan, and modules are interchangeable from one National Society to another and with ICRC Hospital.

The colour code used here has been agreed upon by all ERU partners, and is used for the physical identification of the boxes.

Specifications

Colour code used for ICRC kits and Health ERU
