### 1 x SERVING LADLE, 100ml, stainless steel

- **Capacity**: 100ml minimum
- **Material**: stainless steel
- **Length**: 30cm minimum
- **Thickness**: min 1mm in the center of the scoop
- **Handle**: Securely welded, or in one piece. Handle to resist to 1kg pulling if in two pieces.
- **Finish**: no sharp edges, food grade surface finish $R_a \leq 0.8$ micrometer

### 1 x SCOURING PAD

- **Material**: stainless steel wire scouring pad, 20g minimum

### Packaging and Marking

- **Type**: 1 carton box, outer dimensions 0.3 x 0.3 x 0.25m
- **Material**: double-corrugated, 5 plies, export-quality cardboard
- **Strength**: withstands 6m-high stacking for more than 48h, and 10 handlings. The final package should resist without any damage to a weight or a pressure of 120 kg applied on a strong rigid board on top of the box.
- **Seal**: Long lasting 50mm tape
- **Name**: KITCHEN SET, type 'A'
- **Content**: Name and content list to be printed on the outside of the box
- **Alternative**: Strong, reusable, food grade plastic box with cover

### Packaging:

The primary and secondary packages must be sized in order to protect the goods, avoiding empty space inside the packages, and avoiding empty spaces between boxes on pallets, allowing palletization on pallets of 0.8m x 1.2m without exceeding the size of the pallet. Avoid any unnecessary sub-packaging, especially the single use plastic foils or bags. When sub-packaging is necessary, prefer 100% degradable materials such as paper or cardboard or starch based plastics.

### Test of the box:

The sealed box with its content must withstand the equivalent weight of a pile of the same box at the foreseen height. The equivalent weight is placed for 12h on a wood board on the box. The wood board size exceeds the box size by at least 20mm on each side. The box is placed on a standard pallet, in a corner. When the specific pile height is unknown, the standard height is 4m.

**Example**: a box of gross weight 12kg, foreseen pile height is 4m, height of the box is 0.25m. The box must withstand the weight of 11 identical boxes (4m divided by 0.25m, minus one box). This box will be tested with 132kg (11 x 12kg).
